Experience

System Developer, *KSAT*, Tromsø, Norway 2024 - Present

- Building web applications in Svelte/SvelteKit, leading UI/UX development.
- Designing APIs and databases for scalable systems.
- ML Ops - deploying and maintaining machine learning models in production.
- Working on large, cross team codebases.
- Implementing observability and monitoring solutions for large systems.

Fullstack Engineer, Tech lead, Project leader, *Capia AS*, Tromsø, Norway 2021 - 2024

- Building webapps in django/django+react from scratch to deployment.
- Building and managing 10+ CI/CD pipelines for different projects using Github Actions and Bitbucket Pipelines.
- Leading teams of 3+ developers and interacting directly with customers.
- Fine-tuning Neural Networks for image segmentation and classification.
- Linux system administering - Managing Nginx, backup procedures, and server security.

Education

Master's degree in Engineering Physics
Specialization: Computational Physics

- Umeå university, Sweden 2015 - 2021
- Julius-Maximilians-Universität, Würzburg, Germany 2018 - 2019

Other work

Math's Solution Expert, *Logio* Stockholm 2017
Part-time work delivering pedagogical solution to math problems in the Swedish "Högskoleprovet".
